Significant Accounting policies and other explanatory information to financial statements for the year ended 31st March 2024

Note 1: Corporate information.

RNFI Money Pvt. Ltd. ('the Company') was incorporated in India on 20.06.2019 as a Private Limited Company, under the Companies Act 2013.

The principal activity of the company is to carry on the business of Authorized Money Changer, Full Fledged Money Changer, Authorized dealer in Foreign Exchange subject to the Provisions of Foreign Exchange Management Act, 1999 and RBI Regulations.

Note 2 - Statement of Significant Accounting Policies

The Company has prepared financial statements for the year ended 31.03.2024 in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) together with the comparative period data as at and for the year ended March 31st, 2023. Further, the Company has prepared the opening balance sheet as at April 01, 2022 (the transition date) in accordance with Ind AS. For all the periods up to the year ended March 31, 2024, the Company had prepared its financial statements in accordance with the requirements of previous GAAP, which includes Standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended). These are the Company's first Ind AS financial statements. Refer Note 43 for the details of first-time adoption exemptions availed by the Company.

The financial statements are presented in Indian Rupees Lakhs and all values are rounded to the nearest rupees except when otherwise indicated.

2.1 Basis of preparation

The financial statements have been prepared on the historical cost basis, except for:

- i. defined benefit plans – plan assets that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The Company has consistently applied the following accounting policies to all periods presented in these financial statements.

a) Current versus non-current classification

Assets and Liabilities are classified as current or non – current, inter-alia considering the normal operating cycle of the company's operations and the expected realization/settlement thereof within 12 months after the Balance Sheet date.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

b) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

c) Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, since it is the primary obligor in all of its revenue arrangement, as it has pricing latitude and is exposed to inventory and credit risks. Revenue is stated net of goods and service tax and net of returns, chargebacks, rebates and other similar allowances. These are calculated on the basis of historical experience and the specific terms in the individual contracts. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any). The Company estimates variable consideration at contract inception until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

A handwritten signature in blue ink, consisting of stylized loops and a long horizontal stroke.

A handwritten signature in blue ink, featuring a large loop and a short horizontal stroke.

d) Income Tax.

Income tax expense consists of current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised in OCI or directly in equity, in which case it is recognised in OCI or directly in equity respectively.

i. Current income tax

Current tax is the expected tax payable on the taxable profit for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous years. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

The Govt. of India had issued the Taxation Laws (Amendment) Act 2019 which provides Domestic Companies an option to pay corporate tax at reduced rates from April 1, 2019 subject to certain conditions. The company intends to opt for lower tax regime. No tax provision has been made for the year in view of losses. The company has recognised consequential impact by reversing deferred tax assets.

ii. Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint ventures when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences and the carry forward of any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilised, except:

A handwritten signature in blue ink, appearing to be 'S. Jain'.

A handwritten signature in blue ink, appearing to be 'S. Jain'.

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint ventures deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

e) Inventories

- Closing Stock is valued at cost or Net Realizable Value whichever is lower FIFO Basis.
- Being in Full Fledge Money Changer Business (FFMC Business) Stock of RNFI Money Private Limited consist of foreign currencies which are held for sale/exchange in ordinary course of business in near future.

f) Property, plant and equipment

Plant and equipment are stated at cost of acquisition or constructions including attributable borrowing cost till such assets are ready for their intended use, less of accumulated depreciation and accumulated impairment losses, if any. Cost of acquisition for the aforesaid purpose comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use, net of trade discounts, rebates and credits received if any.

Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

[Handwritten signature]

[Handwritten signature]

Property Plant and Equipment are eliminated from financial statements, either on disposal or when retired from active use. Losses arising in case of retirement of Property, Plant and equipment and gains or losses arising from disposal of property, plant and equipment are recognised in statement of profit and loss in the year of occurrence.

The asset's residual values, useful lives and methods of depreciation are reviewed at each financial year and adjusted prospectively, if appropriate,

Depreciation is calculated on a Written down value basis over the estimated useful lives of the assets. Useful lives used by the Company are same as prescribed rates prescribed under Schedule II of the Companies Act 2013. The range of useful lives of the property, plant and equipment are as follows:

Particulars	Useful Lives
Plant and Equipment	15 years
Computer Software	3 years
Computers	3 years
Motor cars	8 years
Furniture & Fixtures	10 years
Office Equipment	5 years

During the FY 23-24 company has Changed accounting policy w.r.t. Depreciation of tangible Assets from Straight line method (SLM) to Written Down value (WDV) & due to this, Depreciation is increase from Rs. 1,55,393/- during FY 23-24 also changed amortisation of intangible assets from SLM with salvage value (5%) to Amortisation & due to this amortisation is increased from Rs. 1,066.44/- during FY 23-24. The Same is reflected in Note No. 3 & 4 Property, Plant & Equipment & Intangible Assets.

g) Intangible Assets

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the assets will flow to the Company and the cost of the asset can be measured reliably. Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding the amount at which development cost is capitalised are not capitalised and the related expenditure is charged to Statement of profit or loss in the period in which the expenditure is incurred. Developed Technology/ Software and Non- Compete acquired in a business combination are recognised at fair value at the acquisition date.

Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset are reviewed at least at the end of each reporting period. Changes in the

[Handwritten signature]

[Handwritten signature]

expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Company amortises intangible assets over the period of 3 to 10 years, as the Company expects to generate future benefits from the given assets for a period of 3 to 10 years.

The amortization expense on intangible assets is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

An internally generated intangible asset arising from development (or from the development phase of an internal project) is recognized if, and only if, all of the following have been demonstrated:

- i). the technical feasibility of completing the intangible asset so that it will be available for use or sale.
- ii). the intention to complete the intangible asset and use or sell it;
- iii). the ability to use or sell the intangible asset.
- iv). how the intangible asset will generate probable future economic benefits;
- v). adequate technical, financial and other resources to complete the development and to use or sell the software are available, and
- vi). the expenditure attributable to the software during its development can be reliably measured.

h) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an assets or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Company's assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the assets or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does

A handwritten signature in blue ink.

A handwritten signature in blue ink.

not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss.

i) **Borrowing costs:**

- a. Borrowing costs that are attributable to the acquisition, construction, or production of a qualifying asset are capitalised as a part of the cost of such asset till such time the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time (generally over twelve months) to get ready for its intended use or sale.
- b. All other borrowing costs are recognised as expense in the period in which they are incurred.

j) **Leases**

The Company evaluates each contract or arrangement, whether it qualifies as lease as defined under Ind AS 116.

The Company as a lessee:

The Company enters into an arrangement for lease of land, buildings, plant and machinery including computer equipment and vehicles. Such arrangements are generally for a fixed period but may have extension or termination options. The Company assesses, whether the contract is, or contains, a lease, at its inception. A contract is, or contains, a lease if the contract conveys the right to

- a) control the use of an identified asset,
- b) obtain substantially all the economic benefits from use of the identified asset, and
- c) direct the use of the identified asset.

The Company determines the lease term as the non-cancellable period of a lease, together with periods covered by an option to extend the lease, where the Company is reasonably certain to exercise that option.

The Company at the commencement of the lease contract recognizes a Right-of-Use (RoU) asset at cost and corresponding lease liability, except for leases with term of less than twelve months (short term leases) and low-value assets. For these short term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the lease term.

The cost of the right-of-use asset comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the inception date of the lease, plus any initial direct costs, less any lease incentives received. Subsequently, the right-of-use assets are measured at cost less any accumulated depreciation and accumulated impairment losses, if any. The right-of-use assets are depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment.

The Company applies Ind AS 36 to determine whether an RoU asset is impaired and accounts for any identified impairment loss as described in the impairment of non-financial assets below.

For lease liabilities at the commencement of the lease, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate

rate implicit in the lease, if that rate can be readily determined, if that rate is not readily determined, the lease payments are discounted using the incremental borrowing rate that the Company would have to pay to borrow funds, including the consideration of factors such as the nature of the asset and location, collateral, market terms and conditions, as applicable in a similar economic environment.

After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. The Company recognizes the amount of the re-measurement of lease liability as an adjustment to the right-of-use assets. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognizes any remaining amount of the re-measurement in statement of profit and loss. Lease liability payments are classified as cash used in financing activities in the statement of cash flows.

k) Provisions, Contingent liabilities, Contingent assets and Commitments:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liability is disclosed in the case of:

- A present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- A present obligation arising from past events, when no reliable estimate is possible;
- A present obligation arising from past events, unless the probability of outflow of resources is remote.

Commitments include the amount of purchase order (net of advances) issued to parties for completion of assets.

Provisions, contingent liabilities, contingent assets and commitments are reviewed at each balance sheet date.

l) Employee Benefits

Retirement benefit in the form of provident fund, pension fund and superannuation fund are defined contribution schemes. The Company has no obligation, other than the contribution payable to such schemes. The Company recognises contribution payable to such schemes as an expense, when an employee renders the related service. If the contribution payable to the schemes for service received before the balance sheet date

exceeds the contribution already paid, the deficit payable to the schemes is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

The Company operates a defined benefit gratuity plan. The cost of providing benefits under the defined benefit plan is determined on the basis of actuarial valuation.

Remeasurements, comprising of actuarial gains and losses and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs; and Net interest expense or income

Short-term employee benefits :

All employee benefits which are due within twelve months of rendering the services are classified as short-term employee benefits. Benefits such as salaries, wages, and short term compensated absences, etc. and the expected cost of bonus, ex-gratia is recognised in the period in which the employee renders the related service. All short-term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

m) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i. Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost.
- Financial assets at fair value.

When assets are measured at fair value, gains and losses are either recognised entirely in the statement of profit and loss (i.e. fair value through profit or loss), or recognised in other comprehensive income (i.e. fair value through other comprehensive income).

A handwritten signature in blue ink.

A handwritten signature in blue ink.

A financial asset that meets the following two conditions is measured at amortised cost (net of any write down for impairment) unless the asset is designated at fair value through profit and loss under fair value option.

- **Business model test:** The objective of the Company's business model is to hold the financial asset to collect the contractual cash flows (rather than to sell the instrument prior to its contractual maturity to realize its fair value changes).
- **Cash flow characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit and loss under fair value option.

- **Business model test:** The financial asset is held within a business model whose objective is achieved by both collected contractual cash flows and selling financial instruments.
- **Cash flow characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Derecognition

When the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; it evaluates if and to what extent it has retained the risks and rewards of ownership.

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- Based on above evaluation, either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Accounts receivable

Accounts receivables are recorded at the original invoice amount, less an estimate made for doubtful accounts, if any. The Company provides an allowance for doubtful accounts for potential credit losses based on its evaluation of the collectability and the customers' creditworthiness. Accounts receivables are written off when they are determined to be uncollectible.

A handwritten signature in blue ink, appearing to be 'RNFI', written over a light blue grid background.

n) **Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period adjusted for bonus elements and share split in equity shares, if any, issued during the period/year. The weighted average number of equity shares outstanding during the year is adjusted for events such as bonus issue, bonus element in a right issue, shares split and reserve share splits (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders after taking into account the after-income tax effect of interest and other financing costs associated with dilutive potential equity shares and the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

o) **Segment Accounting:**

The primary business segment of the company is Authorized Money changer, which is considered to be a single business segment. Accordingly, the financial statements are reflective of the information required by Indian Accounting Standard 108 – Operating Segments Issued by ICAI.

Nature and Description of Reserves

Capital reserve-

Capital reserve pertains to the reserve created out of the difference between the consideration transferred and the net assets taken over at the time of Acquisition.

General reserve-

General Reserve is used from time to time to transfer profits from Retained Earnings for appropriation purposes. As the General Reserve is created by a transfer from one component of equity to another and is not an item of other comprehensive income, items included in the General Reserve will not be reclassified subsequently to statement of profit and loss.

Retained earnings-

Retained earnings are losses that the group has incurred till date adjusted for acquisition of additional interests from Non-controlling interests post acquiring control, conversion of compulsory convertible debentures and exercise of options.

36 FINANCIAL RISK MANAGEMENT

Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Managing Board.

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates; equity prices and other market changes that affect market risk sensitive instruments.

Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and loans and borrowings.

(i) Credit risk

Credit risk arises from the possibility that counter party may not be able to settle their obligations as agreed. To manage this, the Company periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of accounts receivable. Individual risk limits are set accordingly.

It considers available reasonable and supportive forwarding-looking information such as :

(i) Actual or expected significant adverse changes in business

Exposure to credit risk

Particulars	As at 31 March 2024	As at 31 March 2023	As at 01 April 2022
Loans to employees	11.71	0.26	-
Rental Deposits	16.97	7.85	0.33
Trade Receivables	80.58	15.70	-

(iv) Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price.

The Company's corporate treasury department is responsible for liquidity, funding as well as settlement management.

In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's net liquidity position through rolling forecasts on the basis of expected cash flows.

The table below provides details regarding the remaining contractual maturities of significant financial liabilities at the reporting date based on contractual undiscounted payments.

Maturity profile of financial liabilities

The table below provides details regarding the remaining contractual maturities of significant financial liabilities at the reporting date based on contractual undiscounted payments.

As at 31 March 2024	Less than one year	1 to 5 years	Total
Borrowings	803.73	-	803.73
Trade payables	37.68	-	37.68
Other financial liabilities	-	-	-

As at 31 March 2023	Less than one year	1 to 5 years	Total
Borrowings	572.82	-	572.82
Trade payables	2.88	-	2.88
Other financial liabilities	-	-	-
	575.70	-	575.70

As at 01 April 2022	Less than one year	1 to 5 years	Total
Borrowings	83.14	-	83.14
Trade payables	2.13	-	2.13
Other financial liabilities	-	-	-
	85.27	-	85.27

(v) Capital management

For the purposes of the Company's Capital Management, capital includes issued capital and all other equity reserves.

The primary objective of the Company's Capital Management is to maximise shareholder value. The company manages its capital structure and makes adjustments in the light of changes in economic environment and the requirements of the financial covenants. The company does not have gearing as its cash and reserves are substantial to cover up borrowings.

The Code on Social Security, 2020 ('Code') relating to employee benefits during employment and post employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified and the final rules/interpretation have not yet been issued. The Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective. Based on a preliminary assessment, the entity believes the impact of the change will not be significant

43 First time Adoption of Ind AS

A The financial statements for the year ended 31st March, 2024 are the first annual financial statements prepared in accordance with Ind AS. The adoption was carried out in accordance with Ind AS 101 using Balance sheet as at 1st April, 2022 as the transition date. The transition was carried out from Indian GAAP, which was considered as the previous GAAP. All applicable Ind AS have been applied consistently and retrospectively, wherever, required. The resulting difference between the carrying amounts of the assets and liabilities in the financial statements under both Ind AS and Indian GAAP as of the transition date are recognised directly in equity (retained earnings) at the date of transition to Ind AS.

Accordingly, the Company has prepared financial statements which comply with Ind AS applicable for the periods ended on or after 1st April, 2021. In preparing these financial statements, the Company has availed itself of certain exemptions and exceptions in accordance with Ind AS 101.

The note below explains the principal adjustments made by the Company in restating its Indian GAAP financials statements.

Exemptions availed:

(a) Deemed Cost

The company has elected to continue with the carrying value of all its property, plant and equipment and intangible assets recognised as at 1st April, 2021 measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

(b) Business Combination

The company has elected the option of not restating the past Business Combinations that had occurred before the date of transition to Ind AS.

(c) Investment in subsidiaries

The company has elected the option of measuring its Investments in Subsidiaries at previous GAAP carrying amounts.

(d) Long term foreign currency monetary item

The Management has elected to continue the policy adopted for accounting for exchange differences arising from translation of long-term foreign currency monetary items recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS financial reporting period as per the previous GAAP.

Mandatory Exceptions:

(a) Estimates: An entity's estimates in accordance with Ind AS at the transition date shall be consistent with the estimates made for the same date in accordance with the previous GAAP (after adjustments made to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error. Ind AS estimates as at 1st April 2021 are consistent with the estimates as at the same date made in conformity with previous GAAP

(b) Derecognition of Financial Assets and Financial liabilities: Ind AS 101 requires a first time adopter to apply the derecognition provisions of Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS. However Ind AS 101 allows a first time adopter to apply the derecognition requirements in Ind AS 109 from the date of entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions. Entity has elected to apply the derecognition provisions prospectively for transactions occurring on or after the date of transition to Ind AS.

(c) Classification and measurement of Financial Assets: Ind AS 101 requires entity to assess the classification and measurement of financial assets on the basis of facts and circumstances existed at the date of transition to Ind AS. Accordingly classification and measurement of financial assets have been made on the basis of facts and circumstances that exist at the date of transition to Ind AS.
